

Helping you get the most  
out of your eBIS application.

## Create the optimum approval workflows tailored to meet your business needs and processes!

The eBIS application is a tool that can be tailored to a organisation's requirements by allowing for approval workflows to be built to follow business processes. Whether this be a purchase order approval workflow, new project request or a recruitment approval form, eBIS can help.

With years of collective specialist knowledge as consultants and super users of the eBIS application, you can trust our team to quickly understand your system. We can identify areas for improvements, provide recommendations and help implement changes to maximise the efficiencies of your existing processes.

# How can we help your eBIS System?

There are many ways in which we can help your eBIS application be the best it can be! A few examples are:

- **System Health Check** - A full review of current usage with documented findings, proposals and recommendations
- **System Redesign** – A review of current usage followed by implementation of suggested recommendations for existing systems and processes
- **New System Implementations** – Full system scoping and build, system testing, training, end user acceptance testing, UAT support including documented test plans, go live implementation and go live support.
- **Bespoke Solutions** – Solutions designed and created to meet your business requirements.
- **Training** – Client specific training carried out in your eBIS environment. This can include bespoke training user guides and videos.
- **New Reports** – Assistance in designing and creating reports to ensure your business is getting the information and data it needs out of the

## Why Escone Solutions?

- Do you find your eBIS system is no longer meeting your current businesses processes or requirements?
- Are there gaps in knowledge of the system?
- Are there single points of failure?
- Struggling to find the time to make key changes or enhancements to the system?

## Well, here is how we can help...

- Access to an experienced team of eBIS consultants and super users.
